# Stop Losing Time & Money to Outdated Timekeeping

lilo is a cloud based, facial recognition Daily Time Recording System (DTRS) with location tagging that replaces punch cards, spreadsheets, and physical biometric machines — accessible on any smartphone or computer, anytime and anywhere.

**₱25/mo**

## ⚠ THE PROBLEM TODAY

- Manual timesheets & spreadsheets are error-prone and easy to manipulate — costing you hours every payroll cycle.
- Physical biometric machines break down, require maintenance, and can't track remote or field employees.
- Buddy punching and time fraud inflate payroll costs silently — with no way to detect it.
- HR spends valuable hours manually consolidating attendance data instead of focusing on people.
- Work-from-home and field employees fall through the cracks of traditional timekeeping.

## ★ HOW LILO SOLVES IT

- Facial Recognition Clock-In/Out** — employees snap a selfie to log attendance. No hardware, no contact, no fraud.
- Geo-tagging & Location Checker** — verify exactly where employees clock in. Perfect for field teams and multi-site.
- Works on Any Device** — web and mobile, with offline mode so connectivity issues never stop the clock.
- Real-Time Dashboard** — HR gets a live view of attendance and employee location one place.
- HRIS Integration** — seamlessly connects with your existing payroll and HR system. No double entry.
